Hi, your account was infected! It will be good idea to change the password immediately!
You do not know me and you really are probably interested why you are reading this particular electronic message, right?
I am a hacker who cracked your email and digital devices a few months ago.
Never try to contact me or look for me, it is definitely hopeless, because I sent you this message from YOUR hacked account.
I have started malware soft on the adult vids (porn) website and suppose that you have enjoyed this site to have some fun (you understand what I mean).
While you were taking a look at content, your browser began functioning like a RDP (Remote Control) that have a keylogger that provided me authority to access your display and network camera.
Then, my software acquired all info.
You have wrote passwords on the websites you visited, and I caught all of them.
Of course, you'll be able to change them, or possibly already modified them.
However it doesn't matter, my spyware updates it every time.
What actually did I do?
I got a reserve copy of your device. Of all files and personal contacts.
I formed a dual-screen record. The 1 screen shows the film you were observing (you have got a good taste, wow...), and the second screen presents the video from your own camera.
What do you have to do?
Well, in my opinion, 1000 USD is basically a good amount of money for this little secret. You'll make the deposit by bitcoins (if you don't recognize this, search "how to buy bitcoin" in Google).
My bitcoin wallet address:

1LdUbHeu8XYKpJzmP69SG32NGrIDTHYkMX

(It is cAsE sensitive, so just copy and paste it).

Attention:

You have 2 days in order to make the payment. (I built in an unique pixel to this e-mail, and at this time I understand that you've read through this email).

To monitor the reading of a letter and the activity in it, I utilize a Facebook pixel. Thanks to them.

(Everything that can be used for the authorities can help us.)

In the event I fail to get bitcoins, I'll immediately transfer your recording to each of your contacts, along with family members, colleagues, etcetera?
